

ENERGY SERVICES

Cost-effective energy solutions

- » Energy audits
- » Design-build construction
- » Owner training
- » Remote monitoring
- » Service & maintenance

A MULTIFACETED APPROACH

Hermanson approaches energy conservation from all sides to assure optimal savings. We work in concert with various Public Utility Districts (PUDs) to maximize the client's cost savings with rebates and grants. Our complete energy services package focuses on four key building components:

- › Mechanical system upgrades
- › Control systems and optimization
- › Lighting modifications
- › Building envelope improvements

Working through this process with our clients, we can assure energy savings opportunities.

Mechanical system upgrades

- › Heating and cooling systems upgrades
- › Boilers, cooling towers and chillers upgrades

- › Heating or cooling recovery systems
- › HVAC equipment retro-commissioning
- › Alternate energy systems
- › IAQ remediation and implementation

Control systems and optimization

- › New DDC controls, retro Cx pneumatic controls
- › Variable speed drives and proportional controls
- › Economizer implementation and tuning
- › Energy management programming
- › Optimization of existing systems

Lighting modifications

- › Lighting fixtures, lamps and ballasts upgrades
- › Lighting control, occupancy sensors

Building envelope improvements

- › Insulation, glazing and shading
- › Roofing and weather stripping

Count on comfort

“I would like to thank you for a job well done. Your professionalism concerning this project helped to insure its success... Your expertise and hard work were key in achieving such an outstanding final product.”

MICKEY HANSEN,
Kirtley Cole Associates, Inc

HERMANSON

A Full-Scope Energy Services Company

Since 1979, Hermanson has assisted building owners and tenants with the installation of mechanical systems that meet their facility needs. We have always focused on energy efficiency as an integral part of a well-designed and properly functioning mechanical system. As the “green revolution” has picked up steam, Hermanson’s commitment to energy efficiency culminated in the creation of our Energy Services Division.

Staffed by professionals with over 25 years of experience specializing in energy analysis and optimization, the Energy Services Division provides clients with a full range of services to improve energy efficiency. We understand and will help you through the process to achieve LEED® certification and Energy Star ratings, as well as identifying, estimating, and implementing improvements that provide you with the best opportunity for lowering your energy costs and meeting your environmental goals. Getting the most from your building just makes sense – and Hermanson is ready to help.
