

## **SPECIAL PROJECTS**

**Responsive, organized, efficient**

- » HVAC (Sheet Metal & Pipe) & Plumbing
- » Mechanical Engineering Design
- » Quick Response to Unique Client Needs
- » Focus on Comfort & Functionality

## **STREAMLINED DESIGN AND CONSTRUCTION**

Hermanson Special Projects focuses on quick, well-organized responses to client requests with streamlined mechanical design and construction processes. A single point-of-contact project executive completes the estimate, sets the design direction and manages the construction process assuring that clients receive direct communication from the person in-the-know about their project. Special Projects mechanical installation teams specialize in their unique areas of work.

Whether it is a large data center with extensive cooling requirements or the installation of HVAC and plumbing systems for a high-end downtown restaurant, this efficient approach gets our clients up and running quickly and efficiently.

## **Hermanson Special Projects excels in:**

- › Tenant Improvement work for:
  - › Offices
  - › Retail Spaces
  - › Restaurants
  - › Medical office buildings / clinical spaces
  - › Research & development laboratories
  - › Data centers & server rooms
  - › Educational facilities (K-12 / Higher Ed)
- › Renovations & retrofits to meet changing facility needs.
- › Building mechanical system upgrades (direct-to-owner)
- › Industrial facility upgrades
- › Installation of specialty ventilation systems
- › Design-Build Engineering

**Count on comfort**

“Again we were able to rely on your company to meet our needs and those of our customers. Once again, the work was performed in a timely and professional manner. And I hope that we have an opportunity to work together again.”

**PAT O’NEILL,**

## Experienced, Reliable, Knowledgeable

The work undertaken by Hermanson Special Projects requires an immediate response, a concise approach, and a well-defined process to assure that work is completed both on-time and expertly. For over 30 years, our Special Projects team has met our clients’ unique mechanical system needs with thoughtful, thorough, and prompt design and construction.

Working with building owners, tenants, and code authorities, we seek to deliver the absolute best in mechanical design, construction and service. Our Project Executives and Engineers are knowledgeable and customer-service oriented. Our crews are quick, efficient, and experienced – and they apply these traits to assure that your comfort and productivity are not compromised during work in occupied spaces and that your facilities are functional as quickly as possible. Our goal is deliver an outstanding mechanical system that not only meets your needs, but exceeds your expectations.
